Directs Sardonic Reply To Allen-Scott Report

Editor, The News Leader:

The American public should indeed be grateful that it is served by such enlightened columnists as Robert S. Allen and Paul Scott. I refer specifically to the columns of October 20 and 27. Not only should the loyal defenders of our great republic be grateful, but also admirers of the late Ian Fleming; James Bond has been surpassed.

Even as "Smersh" and "Spectre" have been laid to rest, Allen and Scott expose a new, more frightening menace to free men everywhere, a monstrous conspiracy based on sabotage, espionage and assassination: the deadly, elite Soviet murder agency KGB.

Now those faithful followers of "None Dare Call It Treason" must put aside their relentless pursuit of Communist agents in the State Department, National Council of Churches, and the P-TA, and concentrate on searching the shadows for lurking KGB assassins, trained in the use of their deadly poison-gas pistols and poison-ice atomizers; how can any loving parent and citizen fail to quiver at the deadly exposes of Allen and Scott? Who can sleep while KGB hunts down our defenseless national leaders?

Even James Bond would marvel at those master spy agents, Allen and Scott, who effortlessly prowl the secret and heavily guarded files of CIA, selflessly of course, merely to inform the people of the terror that walks among us.

Citizens awake! Even the late Senator McCarthy would approve of temporarily suspending the search for Reds in the White House; even the Republican Party will allow Bobby Baker and Walter Jenkins temporary respite; we must follow Allen and Scott in the pressing search for those hideous terrorists from the Kremlin. They could be anyone among us: the grocer, the mailman, Mickey Mantle or... our editor?

STEPHEN T. OWEN.
